Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-10 fail to recite sufficient structural elements and interconnection of the elements to positively position and define the structure and components of the claimed invention particularly with regards to the "plug-in" elements, and the "contours" claimed.

Furthermore, claims 4-10 are indefinite with regards to dependency. No multiple dependent claim may depend upon any other multiple dependent claim. Appropriate correction is required before these claims can be further treated on the merits.

In an effort to advance prosecution on this application, the examiner has made a preliminary search on what is believed to be the subject matter of this application in general; however, until the claims are in a more definite form and the 112 rejection has been overcome, the art cited has not been applied in a 102 or 103 rejection. The prior art cited by the examiner is only cited to help the applicant in the construction of more definite claims and it is not to be taken by the applicant that the invention of the present application by any means is considered to contain allowable subject matter over the art cited by the examiner.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and is cited on the attached "Notice of References Cited".

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarah Purol whose telephone number is 571-272-6834.
